

# LITHIUM-ION EMERGENCY LIGHTING LUMINAIRES

FOR EXTENDED  
BATTERY LIFE

THE **GLOBAL SPECIALIST**  
IN ELECTRICAL AND DIGITAL BUILDING INFRASTRUCTURES

# WHAT IS LIION?

LIION is the name given for the range of emergency lighting luminaires fitted with lithium-ion batteries. With an operational lifespan of up to 10 years, the LIION range of emergency lighting products will deliver an extended battery life far beyond the expected lifespan of traditional NiCd/NiMH or lead-acid batteries.

## SAFETY FOR EMERGENCY LIGHTING

There are many types of Lithium battery technologies. The battery of choice used in all LIION products is Lithium Iron Phosphate (LiFePO4), batteries with this chemical mix provide a safer option for emergency lighting applications.

**PROTECTION CIRCUIT MODULE (PCM):** Each battery pack has an onboard PCM which will protect the battery pack from excessive charging and over-discharging.

**iSMART™ TEMPERATURE SENSING:** The LIION range goes above and beyond safety, each luminaire is fitted with iSmart temperature sensing technology. The electronics have been designed to ensure that the battery is not charged outside its specified ambient temperature zones to avoid catastrophic failure.

## LIION AND THE ENVIRONMENT

Emergency lighting products are known for using Lead-acid, NiCd/NiMH batteries. These types of batteries have high environmental impacts due to the blend of heavy toxic metals. The Queensland Governments "EXITCYCLE GUIDELINES" document identifies that approximately five million NiCd batteries are sent to landfill each year. These heavy metals, if not disposed of correctly may be harmful to humans and environment. LiFePO4 batteries don't contain heavy toxic metals; in addition LiFePO4 batteries don't require frequent charging as they can hold charge over long periods resulting in reduced energy consumption. Legrand is at the forefront when it comes to protecting the environment with the LIION emergency lighting range of luminaires.

### MANUFACTURING

All Premium LIION emergency luminaires are designed and manufactured in Australia.

The Economy Series of LIION emergency luminaires are designed in Australia.

All emergency luminaires with AS/NZS 2293.

### WARRANTY

The LIION range has been designed, built and tested to outperform traditional battery technologies. Galaxy LIION emergency luminaires are provided with a 5 year warranty\*. Economy Standalone Series LIION emergency luminaires are provided with a 3 year warranty\*.

\*Refer to installation instructions of each luminaire for full warranty conditions and to ensure a proper maintenance regime is followed as per AS/NZS 2293 series.

## LIION LED INDICATORS

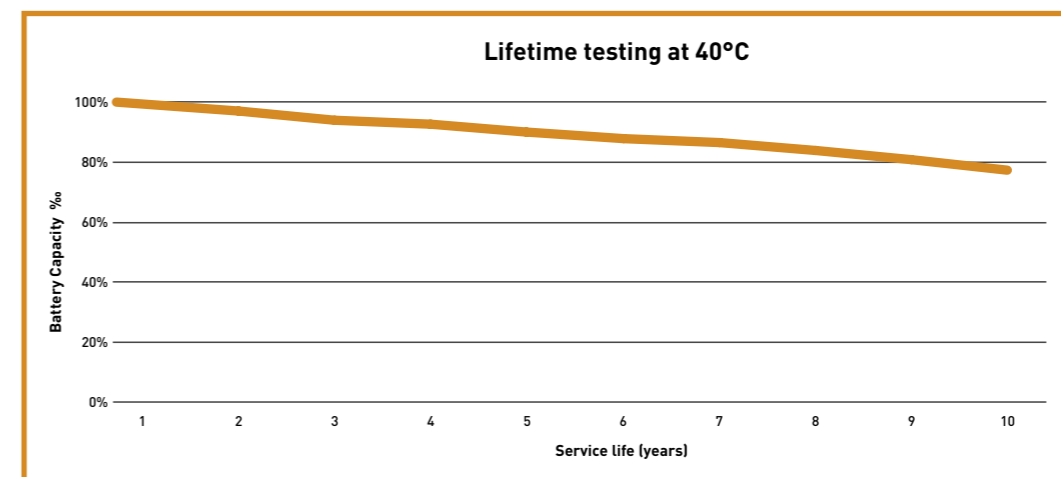

Legrand's range of LIION emergency luminaires have the feature of LED indicators providing visual information on battery charging and battery health.

	<b>Red on</b>	- Battery is in good condition and is being charged when necessary
	<b>Red off</b>	- Loss of mains power, OR - Battery disconnection, OR - Unit is under test, OR
	<b>Slow flashing red</b>	- Battery is faulty and should be replaced

## BATTERY CAPACITY OVER LIFETIME

Legrand has specifically designed the electronics and battery packs of all LIION products in a format that avoids deep discharging during AS2293 testing. Avoiding deep discharging lengthens the operational life of the battery.

Note: Based on proper maintenance and testing regime outlined in AS/NZS 2293 series.
