

Netatmo

Same home, just smarter

Our mission

Our mission at Netatmo is to develop products which help make your home safer, more comfortable and more efficient. We are committed to designing products that are:

✓ **Beautiful**

because your interiors deserve the best

✓ **Intelligent**

so that you don't have to spend your time worrying about them

✓ **Useful**

because no one likes gadgets

Your next home is here

Home is the most intimate space we know. It's where you feel at ease after a hard day. It warms you up on cold winter nights, and refreshes you on hot summer days. It's seen your children grow up, seen them take their first steps and say their first words, and protected them from the outside world. It's where you spend nearly two thirds of your life.

This is why you spent months choosing it, why you spent weekends shopping to furnish and decorate it - so that you'd feel as comfortable as possible within its walls. This is why you take excellent care of it. It's an extension of yourself, of your family. And all of this is what you call "home".

Design, architecture, furniture: nearly everything has changed. And yet, certain things have stayed the same. You have to remember to turn off the lights before leaving, to lock the door for fear of a break-in; you struggle with your radiators to achieve the right temperature, you wonder if you've aired out the rooms enough today. And the least bit of doubt about any of these seemingly insignificant things can ruin your day, just like a pebble in your shoe. Now, you can forget all of this. Thanks to Netatmo, you can have peace of mind.

Simply, intuitively, without ever intruding on your private life; Netatmo helps you take control of your home.

**Netatmo,
same home, just smarter.**

Smart Indoor Camera

Receive alerts in real time and take action if an intruder enters your home

Intruder alerts

Familiar or unfamiliar face? With facial recognition and immediate break-in notification, take action only when necessary.

Access to all features, and no subscription necessary

Video storage and all Indoor Camera features and upgrades are accessible at all times without subscription.

Protect your family's privacy

Use facial recognition to pre-record familiar faces to disable notifications and video recordings of them. Your Indoor Camera's job is to detect intruders, not your relatives.

Fully secure data

Fully secure data with Netatmo, your data is always secure. You can store videos locally on a microSD card using high security encryption and if you wish, back them up to the cloud via Dropbox, iCloud or your FTP server.

Easy to install

You don't have to be a DIY expert or technical wizard to install your camera. You just need a plug socket, smartphone, Wi-Fi and a few minutes to spare to download the app.

Smart Door and Window Sensors

Be alerted even before a break-in occurs

The Smart Door and Window Sensors alert you to a problem even before a break-in occurs. Installed on the doors and windows of your choice, they can tell if someone is trying to force entry. They also detect when a door or window is opened suddenly and send an immediate notification to your smartphone. This saves you valuable time in the event of a break-in.

For an extra layer of security, add the Smart Door and Window Sensors to your Smart Indoor Camera. The Sensors only work with the Indoor Camera.

Smart Indoor Siren

Deter intruders and protect your home from break-ins

The Netatmo Smart Indoor Siren works perfectly with your Smart Indoor Camera to keep your home safe. Using facial recognition, the camera distinguishes between familiar and unfamiliar faces, animals, and harmless movements. No false alarms! If an intruder is detected, it sends a notification to your smartphone, while the Indoor Siren automatically sounds its deafening 110-decibel alarm.

For an extra layer of security, add the Smart Indoor Siren to your Smart Indoor Camera. The Siren only works with the Indoor Camera.

Smart Outdoor Camera with Siren

Be alerted in real time and take action if an intruder trespasses your property

Smart notifications: enjoy peace of mind

Receive a real-time notification via your smartphone when a person or vehicle is detected on your property. You decide what to do next.

Deter intruders with a 105-dB alarm

If intruders enter your property, trigger your Smart Outdoor Camera's siren from your app. The 105-dB alarm will immediately deter them.

No more false alarms

Set up your Outdoor Camera to receive only useful alerts with the Alert-Zones feature and precise notification parameters.

Camera equipped with a smart lighting system

The built-in smart lighting system lights your way at night and even helps you to deter intruders.

Access to all features, and no subscription necessary

Video storage and all Outdoor Camera features and upgrades are permanently available without subscription.

Easy to install

Your Outdoor Camera is easy to install as a replacement for an existing light or in a new location. Then simply connect it to your Wi-Fi.

Smart Home Weather Station

Understand and control your environment

Access data on your indoor and outdoor environment in real time via your smartphone

Access your Weather Station's readings in real time via your smartphone. All you need to know about your indoor and outdoor environment.

Consult your data history to understand your environment over time

Analyse your data to understand your environment over time using past readings and charts accessible in the app.

Customize your alerts to take immediate action

Customise your notifications: select the changes in your environment that you are most interested in.

Improve air quality at home with ease

Improve air quality at home. Your Netatmo Smart Weather Station alerts you when indoor pollution rises.

Explore Netatmo Weather Station readings around the world

Join the Netatmo Smart Weather Stations community to explore real-time readings in more than 170 countries.

Additional Smart Indoor Module

Monitor the indoor environment of additional rooms of your choice. The Netatmo Weather Station can monitor up to three rooms using Additional Indoor Modules. Access temperature, humidity, and air-quality (CO₂) readings in real time via your smartphone.

Smart Rain Gauge

Monitor the rain with your Weather Station

The perfect addition to your Weather Station, the Netatmo Smart Rain Gauge sends rainfall data directly to your smartphone. Check rainfall at home in millimetres per hour remotely and in real time. The highly accurate Rain Gauge measures rain intensity as well as rainfall over the last hour and since midnight.

Smart Anemometer

Monitor the wind with your Weather Station

The perfect addition to your Weather Station, the Netatmo Smart Anemometer sends wind data directly to your smartphone. Using the latest in ultrasound technology, it reliably measures wind speed and direction in real time - even during storms! The Anemometer can also provide you with more precise readings of the "feels like" temperature outside your home.

Voice assistants

For ever richer and simpler uses of our smart objects at the heart of your home, an ever increasing number of our products are compatible with the main voice assistants on the market.
