TRISCAN WEATHERPROOF MOVEMENT SENSOR

3 in 1 Accurate detection

The Triscan uses three forms of detection technology: passive infrared (PIR) which detects heat, microwave which works a little like a radar speed gun, as well as photoelectric. This improves accuracy and reduces nuisance activity.

Features:

- Accurate detection with 3-in-1 passive infrared (PIR), microwave and photoelectric sensors
- Weatherproof IP66 rating suitable for harsh environments
- Detection range: 18 metres
- 120° field of view
- Built-in wiring not accessible from the outside
- Mounting block and gasket supplied
- 5 year warranty

Triscan Movement Sensor
488TRI3W

INDOOR MOTION SENSORS

360° Coverage

Turn lights on and off when needed, this motion sensor detects movement up to 8 metres away within a 360° field of view.

Features:

- Ideal for hallways, walk-in wardrobes and garages
- Detection range: 8 metres
- Detection angle: 360°
- Only turns lights on when required to save energy
- For indoor lights
- 3 year warranty

Indoor PIR Motion Sensor White (Recessed Mount)

PHOTOELECTRIC SMOKE ALARMS

Think safety first!

SMOKE ALARMS

Photoelectric smoke alarms 'see' the smoke. They detect visible particles of combustion, e.g smouldering cigarette smoke. They respond to a wide range of fires, but they are particularly responsive to smouldering fires and the dense smoke given off by foam filled furnishings or overheated PVC wiring.

Features:

- AS 3786:2014 compliant
- Suitable for detecting smouldering fires and dense smoke
- Less prone to nuisance alarms while cooking, as ionisation alarms
- Contains no radioactive material
- Suitable for general use
- Wired interconnectable – up to 20 units
- Power and alarm indicator
- Easy access for wiring
- Hush/Test button
- Low battery indication (audio and visual)
- Dust cover to protect the device during installation
- Mains powered with battery backup

Surface Mount Smoke Alarm
643085

- Replaceable 1-year 9V d.c. battery (backup)

Flush Mount Smoke Alarm
643087

- Non-replaceable 10-year lithium battery (backup)

FALSE TRIGGERING SMOKE ALARMS

Can be used in installations where high levels of EMI signal interference are causing the smoke alarm to false trigger.

On some installations, the smoke alarm may be installed on a circuit shared with other devices that cause electrical interference within the circuit. This electrical noise and electromagnetic interference may cause the smoke alarm to beep or alarm when the electrical products are activated. Legrand 643093 smoke alarm EMI filter filters out this interference which may be causing the smoke alarm to be false triggered.

Smoke Alarm Interface
643086

Smoke Alarm EMI Filter

OUTDOOR

AQUA LIFE Sleek and Robust

Our Aqua Life range of weatherproof switches and sockets are designed with easy to operate rocker switches, two colour options to match exterior walls and a wrapping belt design has been implemented to minimise sharp corners and minimise protrusion.

With a high weatherproof rating these switches and sockets are built to sustain the harsh Australian climate. Aqua Life will deliver supreme performance every time.

Features:

- Ideal for walls in outdoor areas
- Made with durable material
- Sturdy sliders for comfortable and durable operation
- Curved lines for a modern look
- Protective 'Barrier Edge' increases durability against impacts
- Available with flap to achieve higher protection against water and dust
- Available in Limestone grey or Cement grey

NETATMO OUTDOOR CAMERA WITH SIREN

Same home, just smarter

SMART
CAMERA

Detects people, cars & animals

Break-in alerts

105-dB alarm

Integrated lighting

The Smart Outdoor Camera by Netatmo allows you to receive alerts in real time via your smart phone when an unknown person, animal or vehicle enters your property.

The camera has its own built-in smart lighting system. If there is an alert, the floodlight will switch on and can deter intruders. It can be activated manually through the app or set to switch on if a person, car or animal is detected

Features:

- Real time and precise alerts
- Alert zones function: Up to 4 zones to select
- Detection and distinction of people, car and animals
- No subscription fees
- Fully secured data: videos stored locally on an included microSD card
- Integrated smart floodlight
- Infrared night vision
- 100° field of view
- 1080p Full HD video
- Works with Google and Apple Home

SURGE PROTECTION

For protection against transient overvoltage to be effective, the position of the SPD in the installation and the type of SPD must be appropriate for the level of risk.

Exclusive to Legrand, the add-on SPDs make installation and maintenance simpler and safer and enable the associated circuit breaker to be chosen according to the back-up or discrimination requirements of the installation.

Legrand provides solutions suitable for all types of installations and all risk levels.
